Line 330 - Unfulfilled Broadband Service Request Resolution

Ohio – SAC 305062

Cincinnati Bell Telephone (“CBT”) determined the number of unfulfilled broadband service requests based on on-line inquiries and calls to a service representative regarding the availability of broadband service at a particular location. Those who inquired and asked to be notified when broadband service of 10 Mbps or greater became available at their location were considered as unfulfilled requests. CBT maintains a list of these unfulfilled requests. As CBT expands the reach of its broadband network it notifies customers in a newly served area when its broadband service becomes available. Of the unfulfilled requests reported on Line 320, 369 have subsequently subscribed to CBT’s broadband service.

Review of CBT Ohio Facilities and Processes to Remain Functional in Emergency Situations

CBT has processes and procedures in place to comply with the requirements 4901:1-6-31 (F) O.A.C., including the following:

Batteries and Generators

All CO's (and critical ORM's) have appropriately sized generators to carry and hold the CO's for at least 18 to 24 hours and they also have wet cell batteries sized to provide 6 to 8-hours of back-up power for all telecom equipment. All ORMs have wet cell batteries sized for 6 to 8-hours of back-up power and approximately 25% of the ORM building portfolio have back-up generators installed on-site. All bulk power sites (CEV's, CEC, hut and cabinets, etc.) have 7-year warranty batteries with 6 to 8-hours of battery back-up power. All SLC sites have 5-year warranty batteries. Finally, CBT has sixteen (16) portable generators (of various sizes) within the network that can be marshaled to a site if an on-site generator fails or a site without a generator needs to ride-out an emergency situation.

Diverse Facilities

CBT has circuit redundancy and route diversification built into the landline Network for all class 5 Central Offices, including Lucent 5E and Nortel DMS10 offices, as well as SS7 diversification and a robust optical SONET Transport Network. However, if/when a network outage does occur, as in the case of a cable/fiber cut that isolates segments of the Landline Network, the Network Operation Center, which

monitors the entire CBT Network, is able to quickly identify the outage condition, prioritize restoration efforts, including critical circuits/customers affected, and work with other internal groups to determine alternate routing that may be required to restore service and maintain traffic flow. Specifically, the NOC first utilizes TIRKS to determine if spare cable/fiber pairs are available to roll the affected circuits. If so, the NOC works with the Central Office technicians and cable maintenance crews to utilize the spare facilities. If spare facilities are not available, the NOC then works with the planning engineering group, as well as the facilities design group to re-design the cable/fiber routes. The NOC is a 24X7 operation, and utilizes documented callout personnel from various internal departments as necessary during off hours to ensure facilities and network traffic are re-routed as soon as possible. The Cincinnati Bell NOC acts as a Control Center during network outages and communicates progress internally during restoration efforts, including facility routing. In the case of a catastrophic network event, emergency policies/procedures are also implemented and restoration efforts are coordinated with the Disaster Recovery Team.

Congestion Management of Traffic Spikes

CBT manages network congestion resulting from emergency situations using a number of techniques including the use of call gapping and line load control features. In addition, if necessary CBT may be able access spare capacity in some areas to relieve traffic spikes resulting from emergency situations.

B. LIFELINE RECOVERY SURCHARGE

1. General

Incumbent Local Exchange Carriers (ILECs), in accordance with Section 4927.13 (D) of the Revised Code, may recover from end users any Lifeline service discounts that are not recovered through state or federal funding or whose recovery is prohibited by law. In accordance with 4901:1-6-19 (P) O.A.C., ILECs may recover these discounts through a customer billing surcharge on retail customers, excluding those with Lifeline service.

The Company's Lifeline Recovery Surcharge is calculated to recover the difference between the Company's Lifeline prices and the Company's standard retail service prices, minus any portion of the price differences that are recovered through federal or state funding. The Company will update this calculation at least once per year in accordance with 4901:1-6-19 (R) O.A.C.

The Lifeline Recovery Surcharge is imposed on each residence, nonresidence, and payphone access line, other than Lifeline service. For purposes of application of this surcharge, access lines are defined as facilities, which provide access to and from the telecommunications network for toll service and for local calling. Not included in this definition are remote call forwarding and Cincinnati Bell official accounts.
